

Amres VPN za pristup Kobsonu

Amres VPN servis u prvom redu omogućava pristup Kobson servisu izvan Akademske mreže.

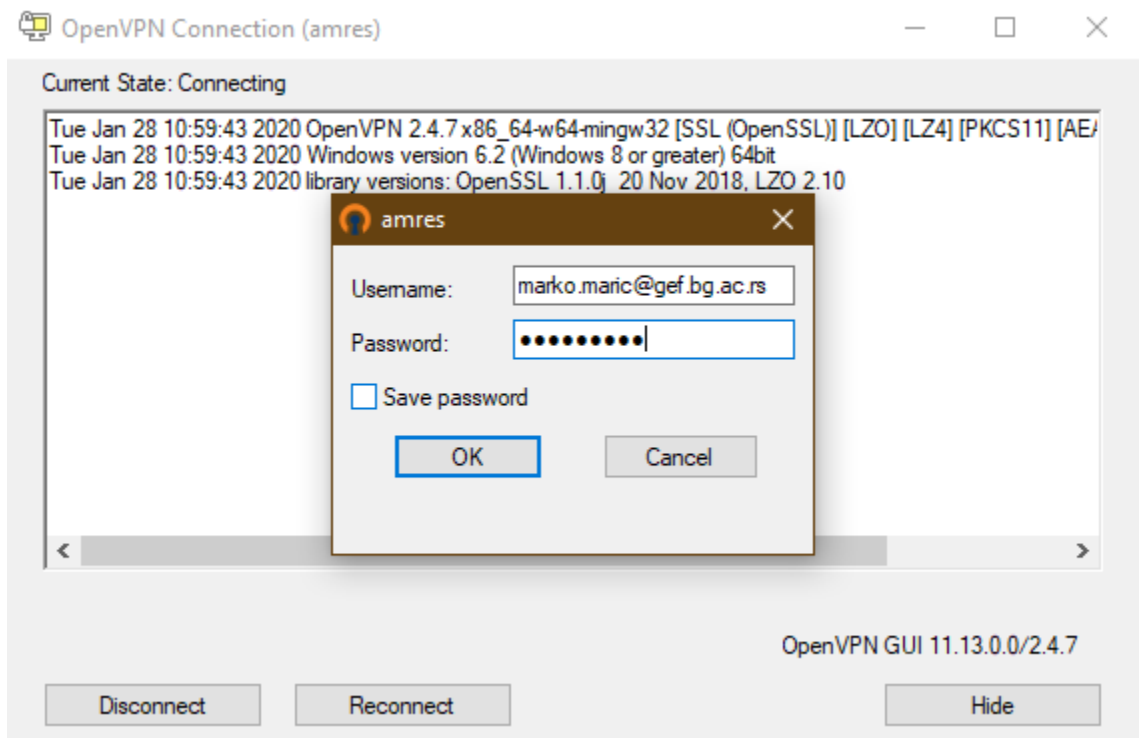

Kako bi ste uspostavili VPN konekciju, morate instalirati OpenVPN klijent koji možete skinuti sa sledećeg linka:

- Windows 7/8: <https://build.openvpn.net/downloads/releases/latest/openvpn-install-latest-stable-win7.exe>
- Windows 10: <https://build.openvpn.net/downloads/releases/latest/openvpn-install-latest-stable-win10.exe>

Posle instalacije nemojte pokretati OpenVPN klijent, već prvo morate ubaciti AMRES VPN profil koji se nalazi zipovan na linku: http://mail.gef.bg.ac.rs/uputstva/AMRES_VPN.7z

Potrebno je da raspakujete fajlove iz arhive u „C:\Users\[korisničko ime]\OpenVPN\config\” folder.

Kada pokrenete OpenVPN klijent, konekciju ostvarujete desnim klikom na ikonicu  koja se nalazi u donjem desnom uglu, pa potom na “Connect”. Nakon toga se logujete username@gef.bg.ac.rs (slika):

Nakon uspostavljanja VPN veze vaš računar dobije još jednu adresu iz opsega dodeljenog Gografskom fakultetu: 10.8.28.0/24 tj. 10.8.28.x

Da bi pristupili Kobson servisu potrebno je da u pretraživaču (brauzeru) podesite proxy, na sledecoj slici je dat izgled za Chrome pretraživač (da nje stižete: ⋮, Settings, Advanced, Open your computer's proxy settings):

The image shows the 'Manual proxy setup' settings in Chrome. On the left is a sidebar with navigation options: Dial-up, VPN, Flight mode, Mobile hotspot, Data usage, and Proxy (which is selected). The main content area is titled 'Manual proxy setup' and includes the following elements:

- A note: 'Use a proxy server for Ethernet or WiFi connections. These settings don't apply to VPN connections.'
- A toggle switch for 'Use a proxy server' which is currently turned 'On'. A red arrow points to this toggle with the annotation 'Klik na "On"'. A red box highlights the toggle.
- Two input fields: 'Address' containing 'proxy.amres.ac.rs' and 'Port' containing '8080'. A red arrow points to the 'Address' field with the annotation 'Uneti adresu i port Amres proxy servera'. A red box highlights both fields.
- A text box for 'Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.' which is currently empty.
- A checkbox labeled 'Don't use the proxy server for local (intranet) addresses' which is unchecked.
- A 'Save' button at the bottom. A red arrow points to this button with the annotation 'Zapamtiti'. A red box highlights the button.
