

**Filesender program:** <https://filesender.gef.bg.ac.rs>

Omogućuje slanje velikih fajlova koji se ne mogu poslati u običnom mejlu. Naime veličina mejla koji neki mejl server prima je ograničena, to ograničenje nije na svim serverima i može vam se desiti da mejl koji je veći od nekoliko MB bude odbijen od servera primaoca. Ako je taj mejl velik zbog prikačenih „Attach“ fajlova ovaj program je napravljen za tu namenu. Naime pomoću ovog programa možete da šaljete fajlove veličine preko 100GB. Princip rada je da vi fajl(ove) stavite na ovaj server „Upload“ a primalac primi mejl sa putanjom za preuzimanje „Download“, takođe možete da primete fajlove tako da pošaljete vaučer mejl u kom se nalazi putanja za „Upload“ fajla na server a vi nakon toga dobijete putanju za skidanje.

Za rad koristite svoj nalog sa kojim pristupate i svom mejlu. Na <https://filesender.gef.bg.ac.rs> dobijete sledeću login stranicu:
